

# Vote Liam Magill #1 VP Campaigns and Engagement

I will listen and campaign on ALL issues affecting students adversely, with an emphasis on promoting wellbeing, diversity and inclusiveness within the Student Union.

The covid-19 has had impacted all clubs and societies. Many have adapted and continue to be active as part of the student community. Many have been unable to adapt.

I will campaign for greater funding to be made available to all clubs and societies to help them bounce back into activity as this pandemic passes.

I will campaign to 'BRING BACK THE CRAIC' to the post pandemic QUB experience. On campus we will need more entertainment events, more live music, more opportunities to meet new and old friends and more craic. Together we can shake off this pandemic gloom.

The pandemic has caused our university experience and education routine to be severely disrupted. Restoring engagement with our passions, environment and your fellow students will be my number one priority. I will promote and strongly assist all clubs and societies to reach out and rebuild our communities with enhanced fun, beauty and vibrancy.

Together lets build a greener, healthier, more equal and prosperous world.

I am particularly concerned by my fellow students experiencing poverty during their study.

The pandemic has removed for many the option to work, amplifying financial problems.

Full time students unable to claim Universal Credit rely on personal savings, their families and university hardship funds.

No Student should choose between paying rent or buying food. Students should never have to visit a food bank.

Students who menstruate shouldn't struggle to afford basic sanitary items

Students should never experience fuel poverty especially in winter. Students should not have to choose which basic essential such as fuel, electricity, clothing, or food to prioritise.

Poverty in the student body reflects the disgraceful and degrading situation in our society where 1 in 4 children live in poverty.

I will campaign to end poverty amongst students and increase the wellbeing of the student body.

Together we can move to end poverty in our communities.
